SUMMARY

Software developer with **3+ years of front-end and fullstack experience** across a startup, an agency and a tech company. Specialized in **Next.js, React and TypeScript**, with back-end experience (Node.js, NestJS, Laravel). Known for **attention to detail** and **“pixel perfect”** interfaces, thorough documentation and an ownership mindset. The only developer, out of 13+, nominated for the company’s **2024 Excellence Award**.

EXPERIENCE

Fullstack Developer · Metagame

03/2026 – present

- Build front-end (Angular) and back-end (NestJS) features for financial metrics, such as net cash and financial health, and for class records.
- Created a dashboard with filterable, customizable columns, so each user builds the view they need.
- Improved usability of the platform’s responsive version, with automated tests in Jest.

Mid-level Front-end Developer · IDK Brasil

11/2025 – present

- Build and maintain complete websites and apps for 10+ brands, such as Riachuelo, SmartFit and Syngenta, choosing the best-fitting technology for each client: React Native, Vue.js, TypeScript, Shopify (Liquid), WordPress with PHP themes, landing pages and email marketing.

Front-end & Fullstack Developer · Watch Brasil

03/2023 – 07/2025 · 2 years, 5 months

- Led a large part of the streaming platform’s migration to **Next.js with TypeScript**, including a scalable “multi-theme” system, channel geolocation and integrations with REST APIs, Google Ads and Google Tag Manager.
- Fixed a critical financial issue in a legacy Laravel PHP back-end, **increasing monthly revenue by 10%**; documented the new workflow and trained the teams.
- Single-handedly delivered the front-end of **two real-time dashboards** (React, MUI, WebSocket) for a Go-Live project, with UI/UX documentation and tests.
- Ran production releases and deployments for two months, taking on technical leadership and the most critical tasks.
- Solely refactored the Vue.js front-end in POCs with microservices (Node.js, AWS Lambda, PostgreSQL), and wrote L-0 and KT documentation.
- Selected for the innovation team and nominated for the **2024 Excellence Award**; mentored three professionals moving into front-end.

FREELANCE PROJECTS

Front-end Developer & Web Designer · Mojo · agency in Baltimore, USA

05/2024 – 08/2024 · 08/2025 – 09/2025

Complete WordPress websites, custom scripts and design work for international companies.

WordPress Redesign · K&L

12/2025 – 02/2026 · 09/2026

Refactored a nearly 9-year-old legacy theme so the team updates content without a developer, plus a mini rebranding.

WordPress Redesign · Balta

01/2026

Custom PHP theme to align the blog with the new visual identity.
